

Astronaut Symphony

Disruptive. Symphonic. Culture.

Led by pianist and composer Scott Patterson, the Astronaut Symphony creates symphonic performance art pieces that will appear in art venues worldwide. The exploration of the vast unknown is at the heart of these pieces. Members of the ensemble will morph in and out of mediums and genres, taking on such roles as musician, singer, dancer, visual artist, and actor to stretch, dismantle and reframe barriers.

Instruments

We are looking for the following instruments:

- ★ Violin I
- ★ Violin II
